Caltech

About

The California Institute of Technology, commonly known as Caltech is a private research university in Pasadena, California. Known for its strength in natural science and engineering, Caltech is often ranked as one of the world's top-ten universities. As of October 2018, Caltech alumni, faculty and researchers include 73 Nobel Laureates (chemist Linus Pauling being the only individual in history to win two unshared prizes), 4 Fields Medalists, and 6 Turing Award winners. In addition, there are numerous faculty members who are serving leadership positions in various U.S. national agency, organizations and academies.

Caltech offers top graduate programs in engineering, biology, chemistry, computer science, earth sciences, mathematics and physics. Caltech participates in a significant amount of research, receiving grants from institutions such as NASA, the National Science Foundation and the Department of Health and Human Services, among others. Caltech maintains a strong tradition of pranking with the Massachusetts Institute of Technology, another top-ranked science and technology university. Companies such as Intel, Compaq and Hotmail were founded by Caltech alumni. Famous film director Frank Capra also graduated from Caltech.
